

Press release: Suonenjoki, Finland, November 8, 2009

ESTEEMED ENTREPRENEURSHIP AWARD TO ARCTIC MACHINE OY

Arctic Machine Oy, the provider of road maintenance and agricultural solutions for demanding contracting needs, was awarded a regional entrepreneurship award in Iisalmi on November 7, 2009. The award was accepted by the entrepreneurs Salla and Juha Jääskelä.

This award is a tribute to the company and its personnel as well as their competent and well-informed clientele. It was awarded for the persistent work that the company has done to become an internationally acclaimed trailblazer in the field of road maintenance solutions. Arctic Machine has been and will continue to be a pioneer as well as a developer and supplier of cost-efficient solutions for demanding contracting needs.

The board of Savon Yrittäjät (federation of entrepreneurs in the Savo region) explained their choice as follows: "Arctic Machine Oy is a strong market leader in its field. It is a strongly growth-oriented developer and a technologically innovative company. Another contributing factor was the fact that the company is a significant regional employer."

"Much of the credit for this award goes to our competent and well-informed clientele. Without close collaboration with our clients, we would never have become the trailblazer that we are today," CEO Jääskelä states.

Arctic Machine is one of the leading providers of demanding road maintenance contracting solutions in Europe. The company and its retail organization operate in nine market areas; in three of them as the market leader. Its subsidiary AM Agro provides solutions for agricultural contracting under the Livakka trademark. In Finland, the company has operations in Suonenjoki, Karttula, and Salo.
