

AM CENTRE- MOUNTED SCRAPER FOR TRUCKS

**Effective road
maintenance**

AM centre-mounted scrapers highly increase your truck's road maintenance efficiency. With them, you can level and shape the road surface as well as plough and remove the packed snow very effectively. When you use them together with additional road maintenance equipment, you substantially increase your road maintenance quality.

ROAD INTELLIGENCE

Versatile and safe solution

The AM 5 HD 2 centre-mounted scraper has an adjustable blade angle, and the AM 6, AM 6 S and AM 4/3 have a fixed one. With them you can easily change the inclination of the road on both sides. Pressure is always applied evenly onto the blade, and with versatile blade angle adjustment you can plough efficiently at various road conditions.

Hydraulic extension wings are a standard feature of this product. They widen the working width on both sides. You can control these scrapers with an ergonomic joystick found in the truck cabin. They are also equipped with numerous safety-enhancing technical solutions.
