

CENTRE- MOUNTED SCRAPERS FOR TRACTORS AM 5 TR AM 6 TR

**Effective
road
maintenance**

AM 5 TR and 6 TR centre-mounted scrapers highly increase the tractor's efficiency in road maintenance. With them, you can level and shape the road surface as well as plough and remove the packed snow effectively. When you use them together with other additional equipment, you increase the road maintenance quality enormously.

ROAD INTELLIGENCE

Versatile and safe solution

The AM 5 TR centre-mounted scraper has an adjustable ploughing angle, and the 6 TR a fixed one. With them, you can effortlessly adjust the inclination of the road on both sides. Pressure is always applied evenly onto the blade, and the proper blade angle adjustment enables you to plough efficiently at various road conditions.

Hydraulic extension wings are a standard feature of this product. They widen the working width on both sides. You can control the centre-mounted scraper with an ergonomic joystick placed in the tractor cabin. The scraper is also equipped with numerous safety-enhancing technical solutions.

Pictures may contain accessories.

Technical Information	AM 5 TR	AM 6 TR
Working width	2,405–3,280 mm	2,475–3,160 mm
Working width of the extension wing, RH	375 mm	375 mm
Working width of the extension wing, LH	305 mm	305 mm
Ploughing angle to the right	max 21.5°	17°
Ploughing angle to the left	max 9.5°	-
Blade inclination adjustment	13°–13°	13°–13°
Blade angle adjustment	85–150°	85–150°
Weight (w. straight blade)	493 kg	506 kg
Lifting cylinder	2	2
Swivelling cylinder	1	-
Inclination cylinder	1	2
Extension wing cylinder RH	1	1
Extension wing cylinder LH	1	1
Oil consumption	20 l/min	20 l/min
