

# SNOW LOADER AM 2500

**More efficient  
snow clearance**

AM 2500 is a very cost-efficient snow loader, because you can simultaneously remove and load snow during snow clearance. It decreases your costs dramatically because it is twice as fast as bucket loading. It also reduces both snow piling and strain on the environment.

**ROAD INTELLIGENCE**

## Developing road safety and transportation capacity

The AM 2500 snow loader keeps your work well organized and easily doubles your snow-loading capacity. Thus you can save tremendously in snow clearance and snow removal costs. It is especially suitable for areas that do not have facilities for storing snow.

When you remove snow frequently, you also have less sand to worry about during springtime in sand removal. With AM 2500, you can also easily remove snow near buildings and sensitive city parks. The loader removes the snow efficiently by circulating it between the tumbler and the throw pipe. This reduces backing, which makes the driver's work easier and improves the road user safety. You can also remove the snow faster and with less strain on the environment.

Pictures may contain accessories.

Technical information	AM 2500
Weight	3,100 kg
Working width	2,650 mm
Capacity	c. 30 m <sup>3</sup> /min
Width	2,650 mm
Height	3,970 mm
Length	2,880 mm
Reverse angle of the ejection pipe	200°
Power of the separate driving motor	138 kW
Transmission	Centrifugal clutch, V-belt planet gear
Min. tip load of the basic machine	7,000 kg
