APPLICATION

FOR STREET CLEANING 

FOR LORRIES 

FOR ALL AREAS 

FOR DIVERSE USE

The AM LQT spreader tanks can be used for anything from street cleaning to the distribution of food-grade water. The purpose of use can easily be modified with optional accessories later. The tanks have a flexible structure and high impact-resistance even in cold conditions, which increases the AM LQT's service life and creates cost

savings. The AM SCW wash head is a versatile set of wash equipment that makes it easier to clean hard-to-reach places. The wash head features a hose with electrical reeling and special nozzles for sprinkling water or pressure washing. The washing angle and height of the jet pipe can be adjusted, as can the separate nozzles, which increases the profitability of the AM SCW.

AM LQT AND AM SCW

Food-grade polyethylene material.

The swivelling wash piping is equipped with fan nozzles and lateral shift.

Can be fitted with a variety of optional accessories for year-round use.

TECHNICAL INFORMATION	AM SCW
Jet pipe width (9 fan nozzles)	2500 mm
Work width with washing angle 0° (calculated)*	3031 mm
Work width with washing angle 35° (calculated)*	2476 mm
Jet pipe reverse angle (right/left)	35° / 35°
Lateral shift (right/left)	500 mm / 500 mm
Lifting movement	639 mm
Hose length (electric 24V hose reel and adjustment nozzle)	20 m
Wash head length (approximate)	1660 mm
Wash head width (approximate)	2585 mm
Dry weight	325 kg

*) The working width is affected by the washing height and angle and the jet shape. The jet shape grows wider as the washing pressure increases.

TECHNICAL INFORMATION	AM TANK 12.6 m³	AM TANK 14.7 m³
Tank length	4880 mm	5680 mm
Tank height from platform floor	1900 mm	1900 mm
Solution tank capacity	12,6 m³	14,7 m³
Solution spreader pipe width	2485 mm	2485 mm
Empty mass, max.	~3100 kg	~3400 kg
Full mass, max. (water)	~15700 kg	~18100 kg
Full mass, max. (salt solution density 1.3 kg/l)	~19500 kg	~22500 kg
Installation length leg frame	5185 mm	5985 mm
Overall length leg frame	6030 mm	6830 mm
Width min. (leg frame)	2270 mm	2270 mm
Installation length hook frame min.	5320 mm	6120 mm
Hook grip height FIN (hook frame)	1570 mm	1570 mm
Width min. (hook frame)	2180 mm	2180 mm
