APPLICATION

FOR TRUCKS 

FOR ALL ROADS 

FOR SALTED ROADS
WITH HEAVY SNOW 

A VERSATILE GENERAL-PURPOSE SIDE-MOUNTED PLOUGH

The AM SHJ side-mounted ploughs are meant for trucks, increasing the unit's ploughing width to up to 8 metres when used together with a front-mounted plough. Short wing models are excellent for lowering snow banks, while high wings are best for areas with heavy snow, and long wings are optimised for wide

main roads. The working width can be adjusted steplessly, which makes it easier to remove snow from difficult places like roundabouts or stops. Its strong structure makes the AM SHJ side-mounted plough a good choice, especially for roads that have many railings or obstacles on the side of the road.
