SUITABILITY

- FOR SALTED ROADS ❁
- FOR TRUCKS ❁
- FOR MAIN ROADS ❁

QUIET AND EFFECTIVE OPERATION

AM HPD plastic-wing plough models are highly suitable for high-speed ploughing and especially for roads that are slushy or that have been de-iced. Thanks to the material and structure of the wing, even slush slides smoothly off the wing. The ploughing angle can be adjusted steplessly 42 degrees to the right or left.

The AM iFLEX™ blade structure of the AM HPD plough is flexible, which makes the plough very quiet and protects road markings. Also, the flexible blade is completely maintenance free. If necessary, the plough can be fitted with a variety of auxiliary equipment later, as needs dictate.
