

# SNOW REMOVAL

## SNOW LOADER

Copyright © Arctic Machine Oy

### APPLICATION

FOR AREAS WITH HEAVY SNOW

FOR WHEEL LOADERS

30–40 LOADS PER HOUR

### EXTREMELY EFFECTIVE SNOW REMOVAL

The efficiency of the AM 2500 snow loader stems from the unit's simultaneous removal and loading of snow. The Snow loader can move against the flow of traffic, creating minimal disturbance to traffic, and cover

large areas or narrow roads that have no room for storing snow. The snow loader makes snow removal much faster, enabling significant cost savings.

# AM 2500

Throwing tube is turning into transport position by 2 cylinders

High loading capacity

Stepless adjustment of the throwing angle

TECHNICAL INFORMATION	AM 2500
Weight	3630 kg
Working width	2700 mm
Capacity	Approx. 30 m <sup>3</sup> /min
Width	2855 mm
Height	3860 mm
Length	2475 mm
Reverse angle of the throwing pipe	270°
Power of the separate driving motor	129 kW
Transmission	Centrifugal clutch, V-belt planetary gear
Min. tipping load of the basic machine	7000 kg

The AM 2500 snow loader can load as many as 30–40 loads per hour, with each consisting of up to 27 m<sup>3</sup> of tightly packed snow. The snow loader can move, load, and throw snow with stepless 200-degree swivelling sideways or up to 30 metres ahead. The snow loader is optimised for areas that need efficient, safe, and fast snow clearance or removal.
