SUITABILITY

FOR IMPECCABLY CLEAN MAIN ROADS

FOR SALTED ROADS ❁

FOR TRUCKS ❁

FOR MAIN ROADS ❁

The AM LPC swivelling plough is a plastic-wing, AM iFLEX™ flexible-blade plough whose 15-part blade structure guarantees impeccably clean ploughing results even without a double blade. The plastic wing of the swivelling plough

is very quiet, protects road markings and effectively moves slush off the wing. These properties make the AM LPC plough an excellent choice for high-speed ploughing of wide main roads.

AM iFLEX™ multi-part flexible-blade structure

Metal parts high-strength steel

The option of being fitted with a multi-part double blade

TECHNICAL INFORMATION	AM 4600 LPC
Transportation width	3980 mm
Working width	3400–4600 mm
Maximum wing height	1100 mm
Ploughing angle	42° - 0 - 42°
Blade angle	51°
Weight (min-max)*	920-990 kg
Double blade weight**	205 kg
Wear disk weight**	40/40 kg

*The weight can change depending on the attachment

**Accessory

The short elements of the blade structure of the AM LPC swivelling plough guarantee excellent ability to follow the road's longitudinal and transverse inclinations. The aggressive blade angle ensures the wing's good throwing characteristics even in difficult road conditions. The plough's blade structure is completely maintenance-free.
