## APPLICATION

FOR ANTI-SKID TREATMENT

FOR LORRIES

FOR ALL ROADS

## PRECISE AND SWIFT ANTI-SKID TREATMENT

The AM 5000/9000 automatic spreaders are a versatile and cost-efficient solution for anti-skid treatment for all roads. One basic machine can be adapted to spread both sand and salt just by switching the conveyor unit. Special attention has been paid to designing the AM automatic

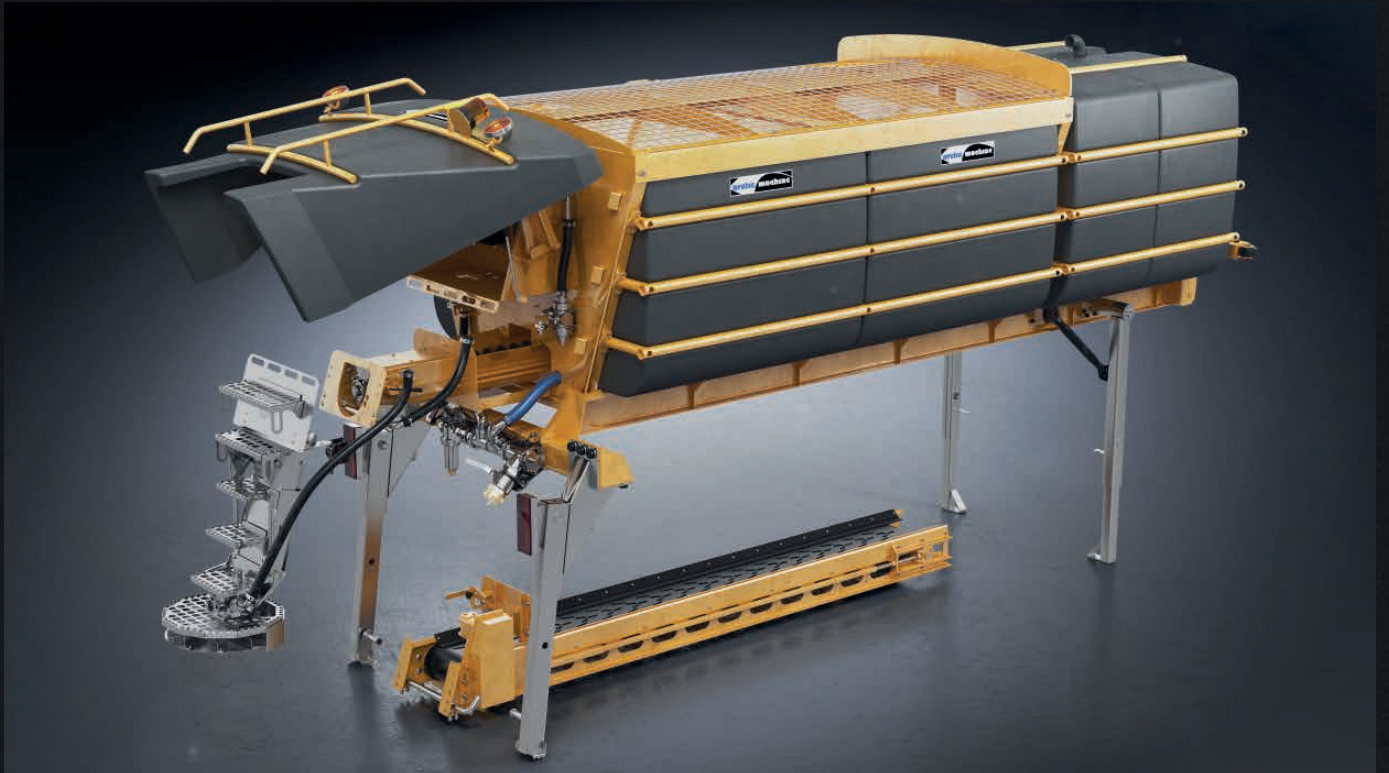

spreaders to maximise the material capacity and utilisation rate and to minimise work costs. The modern iROAD controller with its informative colour display makes controlling the machine easy and safe.
